PROFESSIONAL SUMMARY

Associate Product Manager with 2.5+ years across data and product, who moved from Data Analyst into Product at a multi-city co-living operator. Own **9 operations modules** end to end across **50+ properties**: discovery, PRDs, user stories, prioritisation, sprint planning and UAT. Combine on-ground user research with SQL, Python and Power BI to define KPIs and ship features with measurable impact on food waste, maintenance uptime and audit quality.

CORE COMPETENCIES

Product: Product Strategy, Roadmapping, Product Discovery, Requirement Gathering, PRD, BRD, User Stories, Acceptance Criteria, Feature Prioritisation, Backlog Management, KPI Definition, User Research, Wireframing, UAT
Process: Agile, Scrum, Sprint Planning, Stakeholder Management, Cross-functional Collaboration
Analytics & BI: Power BI, Excel, Google Sheets, Looker Studio, Google Analytics
Technical: SQL, Python, MySQL, Django, JavaScript, REST APIs; Pandas, NumPy, Matplotlib, Seaborn
Tools: Figma, JIRA, Notion, Git, GitHub, VS Code, AWS, Atlassian Confluence

PROFESSIONAL EXPERIENCE

MIS Analyst -> Data Analyst -> Associate Product Manager — **Jul 2025 – Present**
UniLiv · Co-living operator · multi-city

- Own **9 operations modules** end to end and contribute to 3 more, used across **50+ properties**.
- **Cut kitchen food waste 50%** by replacing WhatsApp meal counts with rule-based orders, one kitchen plan and proof of delivery.
- **Raised on-time preventive maintenance from 52% to 89%** by building an asset register and one scheduler for five PM activities, from electrical and servo PM to water tank cleaning and vehicle PM.
- **Lifted average unit audit score from 68 to 81** by replacing paper audits with weighted, evidence-backed UL, CM and CX audits.
- Wrote the **Facility Services Management PRD**: one QR task engine for housekeeping, deep cleaning, pest control and horticulture, with evidence and verification matched to each activity.
- Built the kitchen waste and dispatch report that showed **18% of cooked food** was going to waste, which became the case for the kitchen project.
- Run sprint planning, backlog and UAT with a **5-person engineering team**. Write PRDs, user stories and acceptance criteria.

Data Analyst — **Dec 2024 – Jun 2025**
Ftols System · SaaS

- Built **SQL + Power BI** reporting for **20+ client accounts**, cutting weekly report preparation from 5 hrs to 1 hr.
- Turned recurring stakeholder questions into dashboard requirements and worked with engineering on the data model.
- Flagged a **20% drop in weekly dashboard use** by client ops teams that fed directly into the product backlog.

Data Analyst Intern — **Feb 2024 – Nov 2024**
QSpiders · Training & analytics

- Cleaned and analysed datasets in **Python** (Pandas, NumPy). Built visual reports with Matplotlib, Seaborn and Plotly.
- Optimised **SQL queries** for recurring reports, cutting run time by **40%**.

KEY PRODUCT INITIATIVES

- **AI Hospitality Platform & BI Dashboards —** unified co-living operations into one AI-powered SaaS hub with real-time KPIs and predictive insights (Power BI, SQL, Python). *View project*
- **Resident Mobile App & Complaint Management —** delivered resident-facing SaaS that increased user adoption and accelerated issue resolution. *View project*
- **Preventive Maintenance & Property Cost Intelligence —** shifted maintenance from reactive to preventive and gave leadership cost visibility, reducing downtime and operating costs. *View project*

EDUCATION

Master of Computer Applications — *Guru Gobind Singh Indraprastha University* — **2022 – 2024**
Bachelor of Science — *Maharshi Dayanand University* — **2019 – 2022**
